

ASTRONOMIC TOUR

(2.400 MASL)

SHARED/GROUP SERVICE | 12 PERSONS MAX | DAILY DEPARTURES

Itinerary / Tour Program

9:00 pm pick up from our office in San Pedro de Atacama and depart 7 km to Alluy de Cucuter. We will start a small presentation on astrology before we begin observing the stars and the Milky Way. You will have the opportunity to observe, through high-quality telescopes, various celestial objects such as stars, binary stars, star clusters, nebulae, galaxies, planets, and the moon (depending on the date). The azimuthal mount telescopes allow for a detailed view of these objects with great clarity and color, scanning the San Pedro de Atacama sky over an area of nearly 160°. This makes it possible to observe a vast number of stars and constellations.

11:30 pm approximate arrival in San Pedro de Atacama.
